

# Animal Safari Explore

Take a journey through the jungle as the children work together through this creative experience exploring many different types of animals. With these high quality animal markers children are able to navigate their minds and imaginative dispositions to gain a further understanding of the different imprints these wonderful animals leave on the world. Providing resources for open ended learning allows children to gain confidence and resilience as they build stronger brain connections to the wider world around them. Take a meaningful part in their play as you prompt them with questions surrounding the animal imprint. Maybe even play a game of 'Guess the animal?'. The opportunities are simply endless with our enriched resources and open ended tools.

## Genius learning area

...Creative Expression

## Key dispositions for learning

## Which EYLF outcome does this activity target?

2. Children are connected to the world around them
- d) Children become socially responsible and show respect for the environment

# Animal Safari

## Explore

**inspire**  
Genius

**1** Find a plastic cloth to place down on the table or creative space that you choose to use

**2** Place the playdough in front of your child and allow your child to work through their senses. Then give them the stampers

**3** Use relative language throughout the play to your child. Talk about relative animals. By doing so, this helps support your child to make appropriate connections between two contexts

**4** You can also extend upon this by adding in natural items to see how they respond to them and use them throughout their safari

### Age group

3-4

### Duration

1-2 hours

### Resources required

Playdough

Animal stampers

Natural resources

Popsticks

### Tips:

Try exploring with your child different habitats of other animals in the safari.
